

# ENVIRONMENTAL ASSESSMENT for Union Station to Georgetown Streetcar Transportation Improvements

## PROJECT PURPOSE AND NEED

The purpose of the project is to provide multi-modal transportation improvements in the East-West Corridor between Union Station and Georgetown that offer improved reliability and enhanced mobility for people and goods, consistent with the **moveDC Plan**.

The needs for the project are:

- Provide reliable and dependable Streetcar Service within the East-West Corridor
- Improve East-West connectivity and accessibility for all modes
- Improve transportation system mobility
- Support existing and future land uses
